## LETTER OF TRANSMITTAL.

---

U. S. DEPARTMENT OF AGRICULTURE,  
BUREAU OF STATISTICS,  
*Washington, D. C., May 31, 1911.*

SIR: I have the honor to transmit herewith a compilation of statistics of the imports of farm and forest products into the United States in the year ending June 30, 1910, with those for two previous years given for comparison. The data have been derived from the Bureau of Statistics of the Department of Commerce and Labor, and the work of compiling has been performed by the Division of Production and Distribution, Bureau of Statistics, Department of Agriculture.

This report is a continuation of a series of bulletins on the same subject designed for the use of this Department and to meet the demands of a large number of correspondents, and it contains an arrangement of the statistics and a determination of totals, with various comparisons, not presented in any other publication.

It is respectfully recommended that this report be published as Bulletin 90 of this Bureau.

Very respectfully,

NAT C. MURRAY,  
*Acting Chief of Bureau.*

Hon. JAMES WILSON,  
*Secretary of Agriculture.*

## EXPLANATION OF TERMS.

IMPORTS.—Goods from a foreign country entered at a customhouse.

IMPORTS FOR CONSUMPTION.—The term “entry for consumption” is the technical name of the import entry made at the customhouse, and does not imply that the goods will be actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion. Some of them may be afterwards exported.

FOREIGN EXPORTS OR REEXPORTS.—Goods which have been imported into this country, either for reexport or for consumption, and are afterwards exported, having undergone no change in form or condition or enhancement in value by the application of labor in the United States.

DOMESTIC EXPORTS.—Goods produced or manufactured in this country from either domestic or imported raw materials, and which are shipped to foreign countries.

TRANSIT OR IN-TRANSIT TRADE.—Goods from a foreign country passing through the United States on the way to a foreign country.

TRANSSHIPMENT TRADE.—Goods from a foreign country received at a United States port and there reshipped to a foreign country without being entered as an import into this country.

In-transit and transshipment trade is not included in the imports and exports of the United States, but is reported separately.

THE COUNTRY OF CONSIGNMENT is that which is mentioned in the exporting or importing documents as the one from which or to which the merchandise is to be shipped. The regulations of the Bureau of Statistics, Department of Commerce and Labor, are:

Collectors will consider the country in which merchandise was invoiced as the country whence the same was imported into the United States.

In export statements the countries stated should be, so far as can be ascertained, those for which the exports are destined for a market. \* \* \* Exporters will be required to state in their manifests of goods exported the country of ultimate destination.

The country from which or to which goods are consigned may or may not be the country of origin or ultimate destination, as the case may be; the foregoing regulation with regard to the country of ultimate destination in export statements does not result in a material representation of countries of ultimate destination in place of countries of consignment in the records of the exports of this country, when these two countries are not the same.

VALUES.—The values of imported articles subject to ad valorem duties are defined by the act of Congress of June 10, 1890, as—

The actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported, and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States.

The value of all other imports, whether subject to specific duty or free of duty, is also determined according to the law just quoted.

*The value of domestic exports* is their declared value at the time of exportation in the ports of the United States whence they are exported, which the law requires to be stated under oath, with penalty for misstatement.

*The value of foreign exports* when shipped directly from bonded warehouses (usually dutiable goods) is their import value, but when not shipped from bonded warehouses (usually free goods) the value is determined in the same manner as that of domestic exports.

*Goods in transit* through the United States from one foreign country to another are valued in the same manner as imports.

*Valuation deceptions.*—The value of imported articles subject to ad valorem duties is believed to be determined with more accuracy, according to the legal method of valuation, than the value of imports with specific duties or free of duty, or the value of exported articles; the valuations of dutiable imports and of exports dutiable in foreign countries tend to understatement; and the valuations of imports that are free of duty are liable to inflation for the purpose of trade deception.

*WEIGHTS.*—In the official trade returns of the United States the weights of articles exported are usually net weights, and also the weights of all imports, except those which are subject to a specific duty levied upon the weight of the packages, including the weight of the article itself, together with some or all of its coverings.

All tons mentioned in this bulletin, except where it is otherwise stated, are long tons of 2,240 pounds.

*DISCREPANCIES IN FOREIGN TRADE STATISTICS* of various countries are partly due to different methods of estimating values, of determining countries of origin and destination, and of classifying merchandise, and to differences in dates. The United States does not regard a c. i. f. value (cost, insurance, freight) as the value of either exports or imports (except some foreign exports), while the United Kingdom, for instance, includes these in the value of its imports. It is said that these charges are often erroneously included by British shippers in their statement of export values, especially when the selling price includes insurance and freight.

In consequence of various sources of discrepancy, it is generally futile to undertake to balance an export of this country by any official statement of import into a foreign country, and often there is not an approximate agreement.

*NONCONTIGUOUS POSSESSIONS.*—The noncontiguous possessions of the United States are all those not included between Canada on the north and Mexico and the Gulf of Mexico on the south, and between the Atlantic and Pacific Oceans.

The trade returns of all the possessions of this country, except the Philippine Islands, are included in the total trade of the United States. In the trade statistics for any noncontiguous possession, all other noncontiguous possessions, except the Philippine Islands, are included with the United States; thus, shipments from Hawaii to Porto Rico are included in the total shipments from Hawaii to the United States.

*ABBREVIATION.*—"n. e. s."=not elsewhere specified.

## IMPORTS OF FARM AND FOREST PRODUCTS, 1908-1910.

### GENERAL SURVEY.

The value of farm products imported into the United States during the year ending June 30, 1910, amounted to \$688,000,000, an increase of \$49,000,000 over the previous year, and \$148,000,000 more than in 1908. The value of all merchandise imported in 1910 was \$1,557,000,000, an increase of \$245,000,000 as compared with 1909, and an increase of \$363,000,000 compared with 1908. Imports of farm products formed 44.2 per cent of total imports of all merchandise in 1910, 48.7 per cent in 1909, and 45.2 per cent in 1908. The value of farm products imported in 1910 was \$78,000,000 more than the average for the same products for the five years, 1906 to 1910; but the per cent of farm products of total imports was 1.1 per cent less in 1910 than for the five years 1906 to 1910. (Table 1.)

The value of imports of forest products in 1910 exceeded those of each previous year and amounted to \$179,000,000, an increase over 1909 of \$55,000,000, and an increase of \$81,000,000 as compared with 1908. Of the increase in 1910 over 1909, \$39,000,000 was due to larger imports of india rubber. (Table 2.)

The relative rank of the grand divisions as to the value of farm and forest products imported from them was the same for each of the three years, excepting South America, which ranked second as a source of forest products in 1908 and 1909, but rose to first place in 1910. Each of the grand divisions shows an increase in 1910 as a source of imported farm products, with one exception, Asia, which shows a decrease of \$17,000,000.

Farm products valued at \$232,000,000, or more than one-third of the total farm products imported in 1910, came from Europe; \$181,000,000 from North America; and \$275,000,000 from the other four grand divisions. The grand divisions showing important increases in imports of farm products in 1910 over the previous year were: North America, \$29,000,000; Europe, \$17,000,000; South America, \$9,000,000; and Oceania \$9,000,000.

The value of forest products imported from South America in 1910 amounted to \$55,000,000; North America and Europe each \$54,000,000. Imports of forest products from Europe in 1910, compared with 1909, increased \$22,000,000; South America, \$15,000,000; and North America, \$13,000,000. (Table 3.)

The 6 leading countries in order of magnitude of value of imported farm products for each of the three years shown in Table 4 were: Cuba, United Kingdom, Brazil, Japan, Italy, and France. The farm products imported from Cuba in 1910 increased \$23,000,000 over 1909; Argentina, \$10,000,000; Philippine Islands, \$6,000,000; European Russia, Canada, and Uruguay, each \$4,000,000; and Mexico, \$3,000,000. Important decreases were: Dutch East Indies, \$12,000,000; Japan, \$6,000,000; Brazil, \$3,000,000; and Italy, \$2,000,000.

The value of imports of forest products in 1910 amounted to \$179,000,000, of which \$109,000,000, or nearly two-thirds, came from three countries—Brazil, Canada, and the United Kingdom. Brazil occupied second place in 1908, but rose to first place in 1909 and 1910. Imports from that country in 1910 were valued at \$47,000,000, which was an increase of \$13,000,000 over the previous year, and \$28,000,000 more than in 1908. Other countries showing large increases were: United Kingdom, \$10,000,000; Mexico and Canada, each \$6,000,000; Germany, \$5,000,000; and France, \$3,000,000. (Table 5.)

As shown in Table 6, the aggregate value of the six principal groups of farm products imported in 1910 was \$469,000,000, as compared with \$437,000,000 in 1909 and \$353,000,000 in 1908. These six leading groups and their values in 1910 were: Packing-house products, \$126,000,000; sugar and molasses, \$108,000,000; coffee, \$69,000,000; silk, \$67,000,000; wool, \$51,000,000; and vegetable fibers, chiefly cotton, sisal, manila, and jute, \$48,000,000. The values of other important imports were, in round numbers: Tobacco, \$28,000,000; fruits, \$24,000,000; alcoholic liquors and vegetable oils, each \$23,000,000.

Shipments of farm products to the United States from its island possessions and Alaska were valued at \$88,000,000 for 1910, \$71,000,000 for 1909, and \$73,000,000 for 1908. Shipments of sugar, principally from Hawaii and Porto Rico, and vegetable fibers, chiefly manila from the Philippine Islands, formed more than 92 per cent of the total shipments of farm products from all its noncontiguous possessions to the United States in 1910. The sugar sent to the United States from these possessions was valued at \$71,000,000; vegetable fibers, \$11,000,000; fruits, \$3,000,000; and tobacco, \$1,000,000.

Shipments of forest products to the United States from its noncontiguous possessions in 1910 were valued at \$232,000, more than one-half of which represented lumber from Hawaii and the Philippine Islands. (Tables 7 to 13.)

<sup>1</sup> The classification employed from 1890 to 1901 differs from the present classification by including prepared opium and (in 1896-1901) gelatine, but not cochineal, licorice root, nor (in 1891-1893) beer extract. The value of the products included in this table for 1890-1901, but not subsequently, was as follows: Prepared opium, 1890, \$269,886; 1891, \$567,035; 1892, \$547,528; 1893, \$446,422; 1894, \$310,771; 1895, \$920,006; 1896, \$735,134; 1897, \$1,132,861; 1898, \$652,341; 1899, \$828,203; 1900, \$1,065,965; 1901, \$972,582; gelatine, 1896, \$15,386; 1897, \$5,748; 1898, \$25,907; 1899, \$21,961; 1900, \$30,361; 1901, \$23,230; the value of the products now included, but not in 1890-1901, was as follows: Cochineal, 1890, \$42,435; 1891, \$19,779; 1892, \$55,883; 1893, \$52,572; 1894, \$28,124; 1895, \$38,568; 1896, \$50,988; 1897, \$41,943; 1898, \$45,762; 1899, \$23,207; 1900, \$31,211; 1901, \$20,414; licorice root, 1890, \$794,503; 1891, \$896,597; 1892, \$1,601,028; 1893, \$1,688,716; 1894, \$1,209,728; 1895, \$1,404,563; 1896, \$1,401,748; 1897, \$1,022,050; 1898, \$1,171,621; 1899, \$1,566,830; 1900, \$1,667,250; 1901, \$1,737,097; beer extract, 1891, \$6,470; 1892, \$5,411; 1893, \$2,291.
